

# Nanosoft announces nanoCAD® Plus 7.0

## Your next DWG compatible CAD is here

September 9, 2015 - Nanosoft announces nanoCAD Plus 7.0, the newest version of its DWG-compatible CAD application software.

nanoCAD is optimized for production design and drafting, and high-performance platform CAD application development. It uses the same industry standard technology for reading and writing DWG format files that is used by most of the world's top CAD, CAM, and CAE developers, and is compatible with DWG files created as far back as 1990.

nanoCAD is full-featured professional-grade CAD software, used by a million architects, engineers, designers, and drafters around the world, to design and support billions of dollars of manufacturing and infrastructure projects.

nanoCAD may be the only CAD program actually designed, from the beginning, to solve a business problem. Budget is an issue: At \$1,680 per year for a single seat of AutoCAD 2016 (the current 1 year subscription price), upgrading can be a hard sell.

nanoCAD Plus 7.0 is designed to provide a smooth migration path for existing AutoCAD users, and is priced to reflect budget reality: At only \$180 per year per seat, including priority support and updates (\$220 per year for a floating network license), companies can buy as many seats as they need, rather than only as many as they can afford. And it includes features of hi-grade CAD software, such as point cloud processing, embedded PDF-printer, drawing underlays of document and raster format files with object snap capabilities, easy navigation in 3D with fly and walk-through to mention a few.

## nanoCAD Plus 7.0 key features

- Industry standard interface and command structure: Familiar and comfortable for users of many other compatible CAD applications, including AutoCAD and AutoCAD LT.
- Fully capable: nanoCAD Plus includes a rich set of tools for creating and editing 2D/3D objects. It is production proven in demanding applications.
- New and improved: Advanced layer management, Z-coordinate healing, batch plotting, hybrid raster/vector editing with raster snap, proxy-garbage removing, drawing underlays: PDF, DWF and DWFx, network license management and more.
- New advanced tools for professionals: Point clouds processing, Fidesys CAE software integration, easy navigation in 3D and more.
- Completely customizable: Scripting engine for macros written on Visual Basic Script, Java Script or any other scripting language supported by Microsoft Windows as well as built-in LISP. For more serious development, nanoCAD supports multiple APIs, including NRX for C++ and .NET (similar to ARX), and the MultiCAD API™ for C++ and .NET, a revolutionary development tool

to create binary compatible applications that will run not just in nanoCAD, but also in other compatible CAD systems, including AutoCAD. Everybody can join the nanoCAD Developer Club, at no cost.

- Support for OEM licensing: Software developers or manufacturers wishing to build vertical applications on top of nanoCAD Plus can get excellent OEM licensing terms.
- Priority support and updates: nanoCAD Plus subscriptions include priority support, via email, our customer forums, and our help-desk. nanoCAD Plus subscriptions also include updates, with early access to bug-fixes, and all major and minor product updates.
- Unbeatable TCO: With nanoCAD Plus, there are no high-priced software license fees or extortionate annual maintenance and support contracts— just a simple all-inclusive subscription, priced at \$180/year (\$220/year for a floating network license.)

## About Nanosoft

Nanosoft is a community of CAD professionals. Our team consists of people who have been working in the CAD software industry for years—many since the 1980s. We are focused on the creation of high-quality cost-effective CAD solutions. An important goal for us is to provide our customers with an ideal vehicle to upgrade from the use of unlicensed (pirated) CAD software to the use of legitimate software. To accomplish this, we must do our best to minimize any transfer effects experienced by our customers. That is why one of our key strategies is the development of low-costs and free software products.

nanoCAD Plus 7.0 can be downloaded and purchased on the web, from [market.nanocad.com](http://market.nanocad.com).
